An undergraduate Computer Science student, specializing in Intelligent System, where I focus on how Artificial Intelligence and data can be applied to solve practical issues. I'm passionate about exploring AI, software development, data science, and UI/UX design through projects and courses, I've developed skills in Python (scikit-learn, pandas, numpy, matplotlib), machine learning model development, and data analysis (Excel, SQL). Beyond tech, I enjoy exploring different fields that broaden my perspective and help me grow both personally and professionally. These experiences have strengthened my ability to think critically, collaborate effectively, and approach every work with clarity and precision.

Education

Bina Nusantara University

Sep 2023 - Sep 2027 (Expected)

Bachelor of Computer Science, GPA 3.53 / 4.00

Working Experience

Binus University - Tangerang, Indonesia

Jun 2023 - Sept 2023 & November 2024
